Cybersecurity Executive Order "Strengthening the Cybersecurity of Federal Networks and Critical Infrastructure"

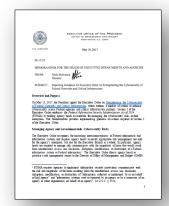

Background

- May 11th White House issued the Executive Order "Strengthening the Cybersecurity of Federal Networks and Critical Infrastructure"
 - Renewed emphasis on cyber risk management
 - Manage cybersecurity risk as an executive branch enterprise
 - Risk management decisions made by agency heads can affect the risk to the executive branch as a whole

- May 19th Office of Management and Budget (OMB) issued Memorandum M-17-25, "Reporting Guidance for EO on Strengthening the Cybersecurity of Federal Networks and Critical Infrastructure"
 - Provides additional guidance to supplement the EO

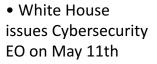

Seven Areas of Focus

Focus Area

- 1. Document Risk Mitigation and Acceptance Choices
- 2. Describe Action Plan to Implement NIST Cybersecurity Framework
- 3. Provide Current IT Architecture to Evaluate Shared Services
- 4. Identify Capabilities Supporting Cybersecurity of Critical Infrastructure
- 5. Advise on Resilience Against Botnets and Other Automated, Distributed Threats
- 6. Report on Deterrence and Protection Options
- 7. Document International Cybersecurity Priorities
